A low-angle, upward-looking photograph of several modern glass skyscrapers. The buildings are covered in reflective glass panels that mirror the sky and each other, creating a complex grid of lines. The perspective is from the ground looking up, making the buildings appear to converge towards the top of the frame. The sky is a pale, clear blue.

OUR OFFERINGS

ARIADNE'S OFFERINGS

Ariadne Business Analytics offers three main products and services which are:

- Consultancy services in the risk management area
- Ariadne Software as a Risk Management and Financial Simulation tool
- ACTUS as the underlying data infrastructure of Ariadne Software

OUR SERVICES

In our Consulting Services we apply our core knowledge "quantitative financial analytics" to the benefit of our client's risk and general management activities. Having the right underlying concepts and a transparent consistent data infrastructure is key. That's why our services are structured in three main parts:

- Data and Analytic Infrastructure Consulting
- Business and Risk Consulting
- Implementation of Software Solutions (incl. training and model building)

OUR SOFTWARE

In our Ariadne Software we offer a modular approach for advanced analytics in:

- Enterprise and Strategic Risk Management
- ALM and Balance Sheet Capital Management
- Portfolio Risk Management
- Liquidity and Treasury
- Profitability measurements

Besides covering traditional basic static analytics, the strength of Ariadne Software is in the area of dynamic simulation in a going concern perspective. This is the foundation of balance sheet and capital management as well as of strategic risk and business decision making.

The core of financial calculations within Ariadne Software is based on ACTUS, an open-source initiative. We at Ariadne are ACTUS specialists who offer ACTUS training and maintenance.

TARGET INDUSTRIES

We craft solutions and provide consulting for the following sectors:

- Banking
- Insurance
- Non-Financial

ABOUT ARIADNE

Ariadne is a new initiative in Finance and Risk Management. It is profiting from over 100 combined years of successful entrepreneurial and academic experience of our Ariadne founding partners. Our team combines a unique combination of skills and experience in financial and enterprise risk management, risk software development, finance and risk consulting.

Ariadne was initiated by Willi Brammertz, the lead author of "Unified Financial Analysis". Financial experts consider Willi Brammertz to be the driving force pushing the edges of financial analytics and leading the industry forward.
